Responsible Packaging

Aeroplus have been working on a kerbside recyclable pot range since 2014.

This project was kick started after several major UK retailers challenged us to provide curbside recyclable products.

We have tested many different materials and master batches; many products have failed, and we have learnt a lot about how many master batches contain carbon black pigment. To assume that the product can be detected on NIR lines just because it's not black is not acceptable.

We initially concentrated on post industrial waste streams as these tended to offer consistent quality and higher tonnages of available materials at the time. However, it quickly became apparent that the market demanded post-consumer recycled (PCW) materials.

This added its own unique challenges with available tonnages and consistent quality. Working closely with our material and master batch suppliers we have been able to develop a product manufactured from up to 98% UK post-consumer waste streams.

For Aeroplus it was very important that we helped to find another life for the UK's single use plastic waste, we manufacture all our curbside recyclable products in the UK to keep our carbon footprint to a minimum.

It's been a pleasure working closely with organization's like Recoup, Viridor, Biffa and Tomra to name a few who have helped us develop this range of products.

To have Recoup/Tomra independently verify that our products are carbon pigment free and that they can be sorted in NIR facilities is truly invaluable.

Our mission is to harness the skills of our employees with a commitment to providing a high-quality service.

All our company activities are carried out in full accordance with current Health and Safety legislation.

We strive to offer the very best customer service and to maintain in-depth knowledge about our industry and only engage with suppliers/partners who deliver a high standard of service and workmanship.

We are leading in environmental change, helping our customers to reduce their environmental impact and minimise their carbon emissions.

We believe in leading by example and are committed to keeping our own environmental footprint to an absolute minimum.

Our values are expressed by the duty of care we show for employees/customers and the environment.

We care about the environment and the impact that we may have on it.

We seek to minimize waste, recycle as much materials as possible and use resources sparingly.

Our green credentials

At Aeroplas, we take our environmental responsibilities seriously.

A healthy and sustainable environment means a better future for our children and their families.

We always use our resources as efficiently as possible and our environmentally-friendly practices help us do this.

To find out more, please contact us.

At Aeroplas, our products can be supplied in virtually any colour of your choice. From natural tones to bright colours, we can provide you with the exact colour that you need. Our team will guide you through the colour options and offer their expert advice on which colours to choose.

Please note that product colours may vary due to the limitations of the printing process.

Aeroplus are proud to offer our customers a free recycling service.

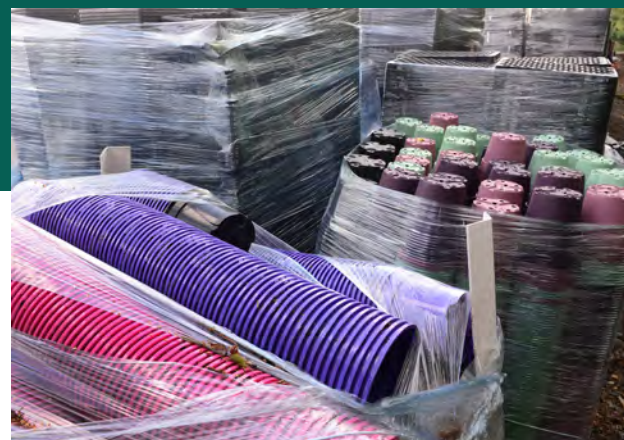

We collect your waste when we make a delivery to you. Unfortunately we cannot make special journeys to collect waste material.

WE RECYCLE:

- We can recycle all bedding packs, carry trays and liner/plug trays manufactured from HIPS – Code 6 (High Impact Polystyrene).
- All pots lightweight and rigid manufactured from PP – Code 5 (Polypropylene).

CONDITIONS:

- All product must be free of compost and stacked on neat stable pallets.
- We cannot accept any RPET – Code 1 material and reserve the right to pass on any disposal costs of RPET.
- Please note not all of our competitors are correctly labelling their PET product. If you are unsure of the material you have on site please contact one of our Sales Managers who will happily make a site visit.
- We will collect and recycle competitor's product at our discretion.

Consider Your Carbon Footprint

Our increasing carbon footprint is having profound effects on the environment.

We must all take responsibility and consider our own carbon footprint.

With this in mind, Aeroplus as market leaders were determined to develop their curb-side recyclable pot ranges from UK post-consumer waste.

The majority of our material is made up of single use plastics that the UK consumer has sent for recycling. We have also considerably reduced our carbon footprint by sourcing our materials from within the UK.

On top of that, virtually all of our products are manufactured in the West Midlands again greatly reducing our carbon footprint in comparison to our European competitors.
